

Keep Damaging Surges Outside.

Over 750,000 electric utility customers are protected by our meter base surge protector 24x7x365!

The SS320 series of Low-Profile meter base surge protector includes our latest and greatest design, protecting homes and small businesses from potentially damaging surges caused by thunder storms and other abnormal events on the electrical system.

Step 1

STEP 1 - Meter Base Protector Installed behind the electric meter, the meter base protector diverts the largest portion of a surge safely into the ground, before it can enter the house, protecting major appliances.

STEP 2 - Plug-In Protector

Protects sensitive electronics such as computers, TVs and game systems. To protect them, we offer Premium Plug-In Protectors.

Is there a new Low-Profile Surge Protector in your future?

Don't wait to see the damage a surge can cause. Consider a surge protection program with utility grade surge protection equipment.

We are here to help!
800-362-9997

Designed by utility engineers, the SS320 low-profile meter base surge protector handles the surge "outside", sending it to earth ground before it can enter the home and cause damage.

You'd Be Shocked At How Much Surge Damage Could Cost You!
